# Company PROFILE

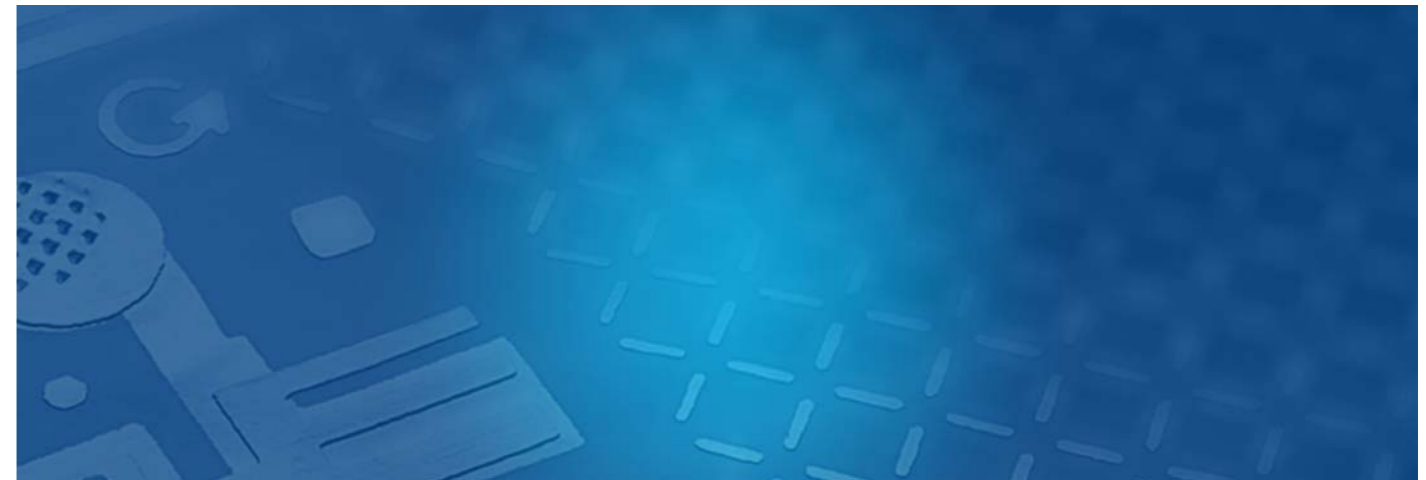

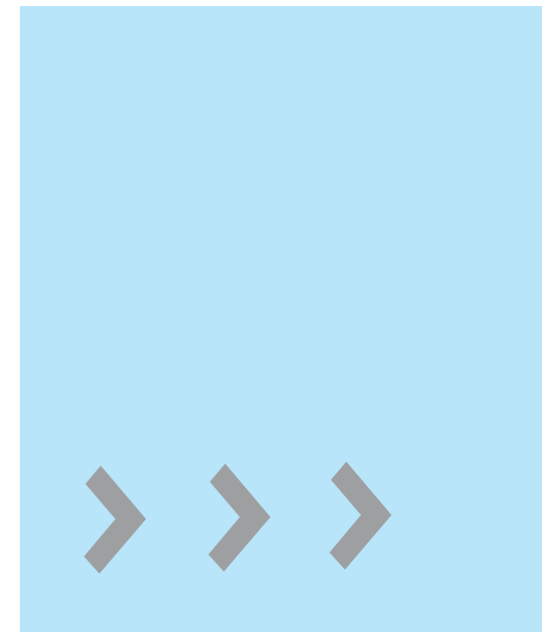

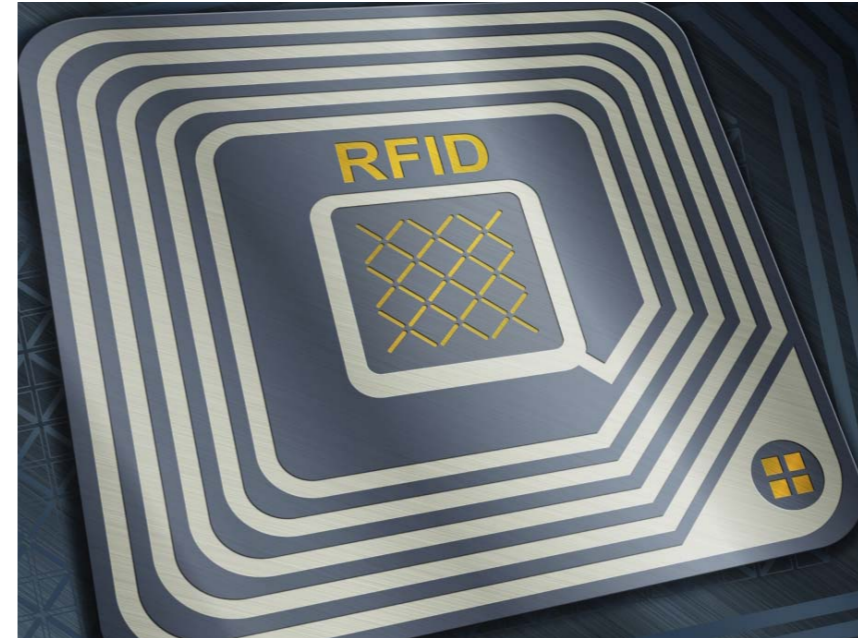

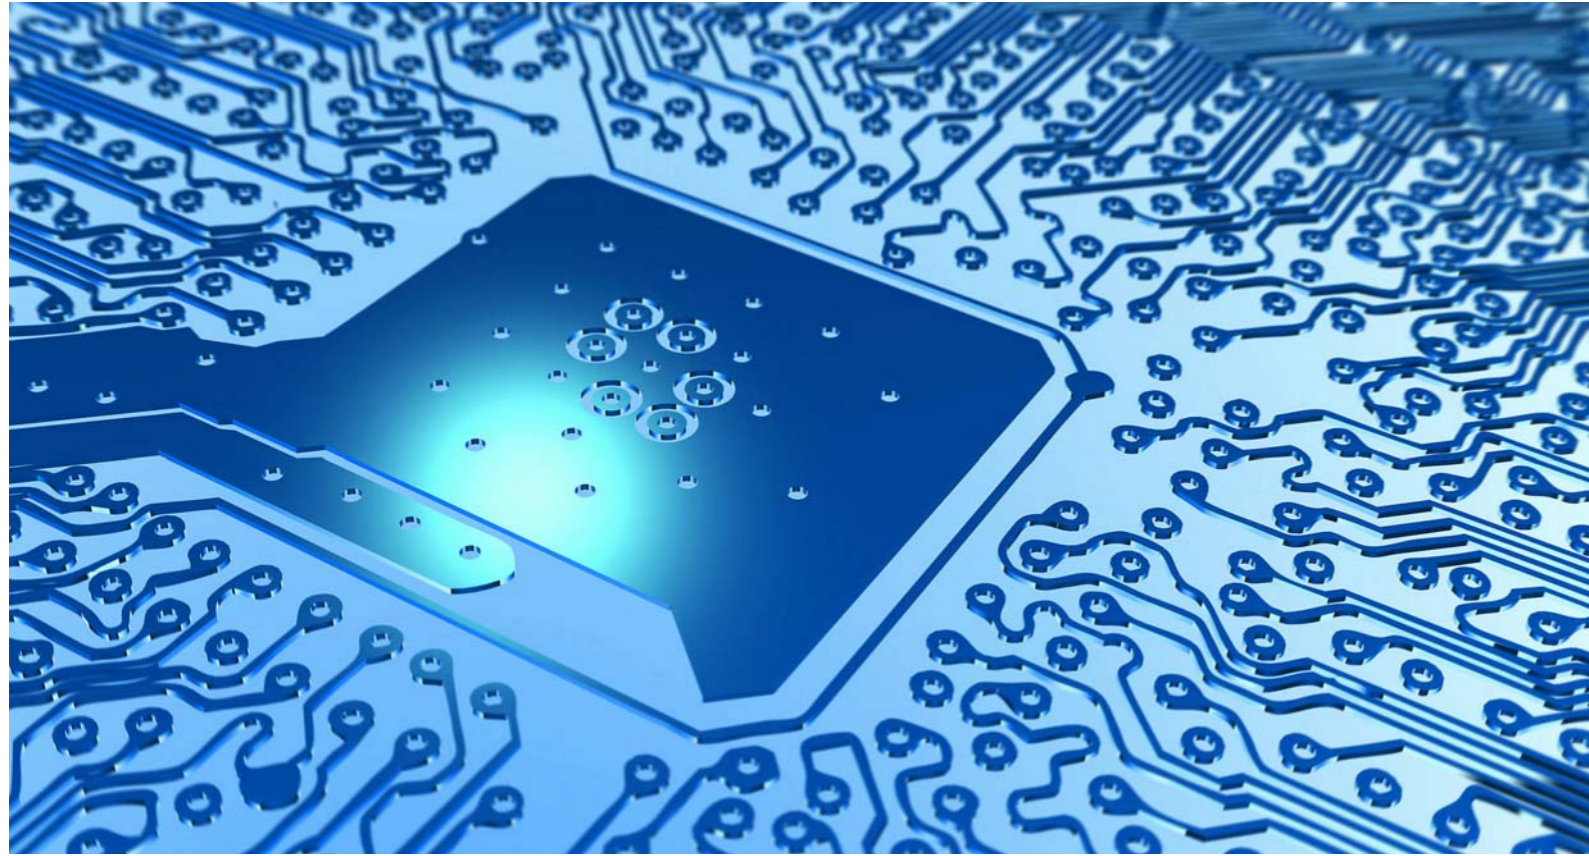

**A**CUBE INFOTECH is a leading provider of business solutions in the field of UHF RFID in the Middle East Region. Core services include the development, implementation, and maintenance of customized business solutions that leverage advanced RFID technology.

We in ACUBE believes that necessity is the mother of all innovation. ACUBE is promoted by experienced techno entrepreneurs. The promoters has invested a decade in providing RFID and system integrated solution thereby building goodwill and commercializing state of the art technology for various reputed organizations in the GCC.

ACUBE RFID application have proven track record of improving business processes where identification, authentication and automation are of prime concern. ACUBE have partners with leading RFID tags, readers companies worldwide. We take prior expertise to provide quality services to our clients.

Our people in ACUBE are multi skilled and multi-disciplined offering clients a wide range of industry focused business solution.

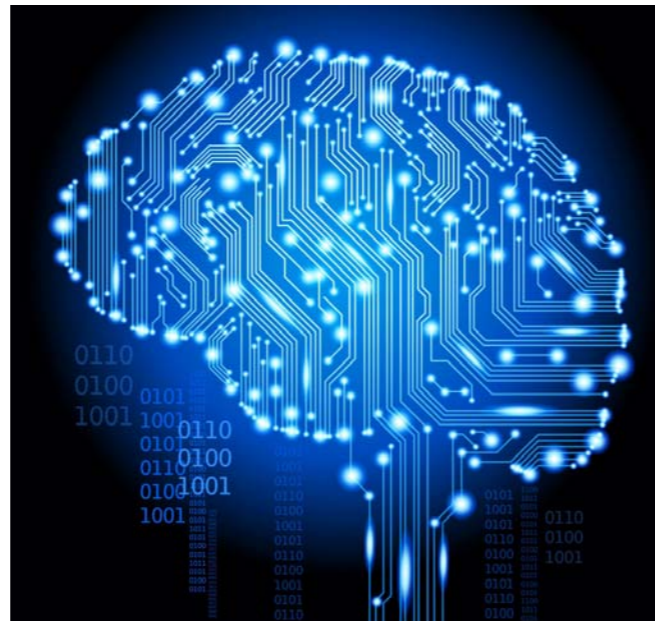

## BUSINESS VISION:

World class ICT solution provider in the region. To build long term relationships with our customers and clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

## MISSION STATEMENT:

We inspire to become a leader in enhancing RFID and System Integrated services using futuristic solution. ACUBE is the real innovator, continuously creating solutions, inspired by innovation and empowered by technology.

## CORPORATE VALUES:

We believe in treating our customers with respect and faith. We grow through creativity, invention and innovation. We integrate honesty, integrity and business ethics into all aspects of our business functioning

- All our activities will be evolved around these principles that we hold dearest to our heart.
- Quality performance
- Expertise
- Customer focus
- Business integrity
- Mutual trust
- Fairness in dealings

## TO OUR CUSTOMERS:

- We will deliver our promises in full
- We will always provide the best of products and services at all times
- We will strive to exceed customer expectations and ensure their total satisfaction.
- We will always maintain the highest standards of professionalism
- We will focus on continuous improvement to ensure superior value.

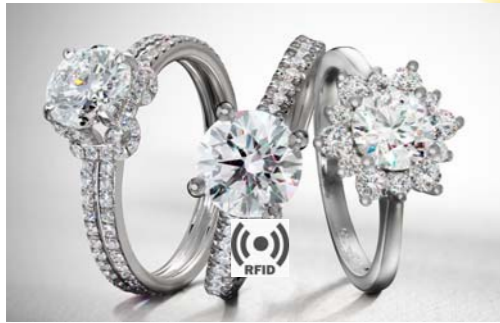

## CORPORATE SOLUTIONS

### JEWELRY

- Jewelry Management
- Security & Shrink Management
- Stock Transfer Management
- Automated Inventory System

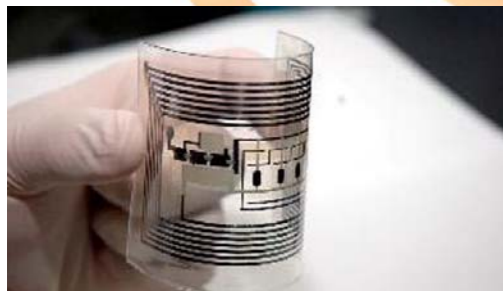

### CONSTRUCTION

- Time & Attendance
- Zone Monitoring
- Construction Materials Management
- Vehicle Tracking
- Asset Management

### BANKING/MEDICAL

- Asset Management
- File & Document Management
- Patient Tracking
- Surgical Equipment tracking
- People Counting

### RETAIL

- People Tracking
- Asset Management
- Inventory Management
- Document Management

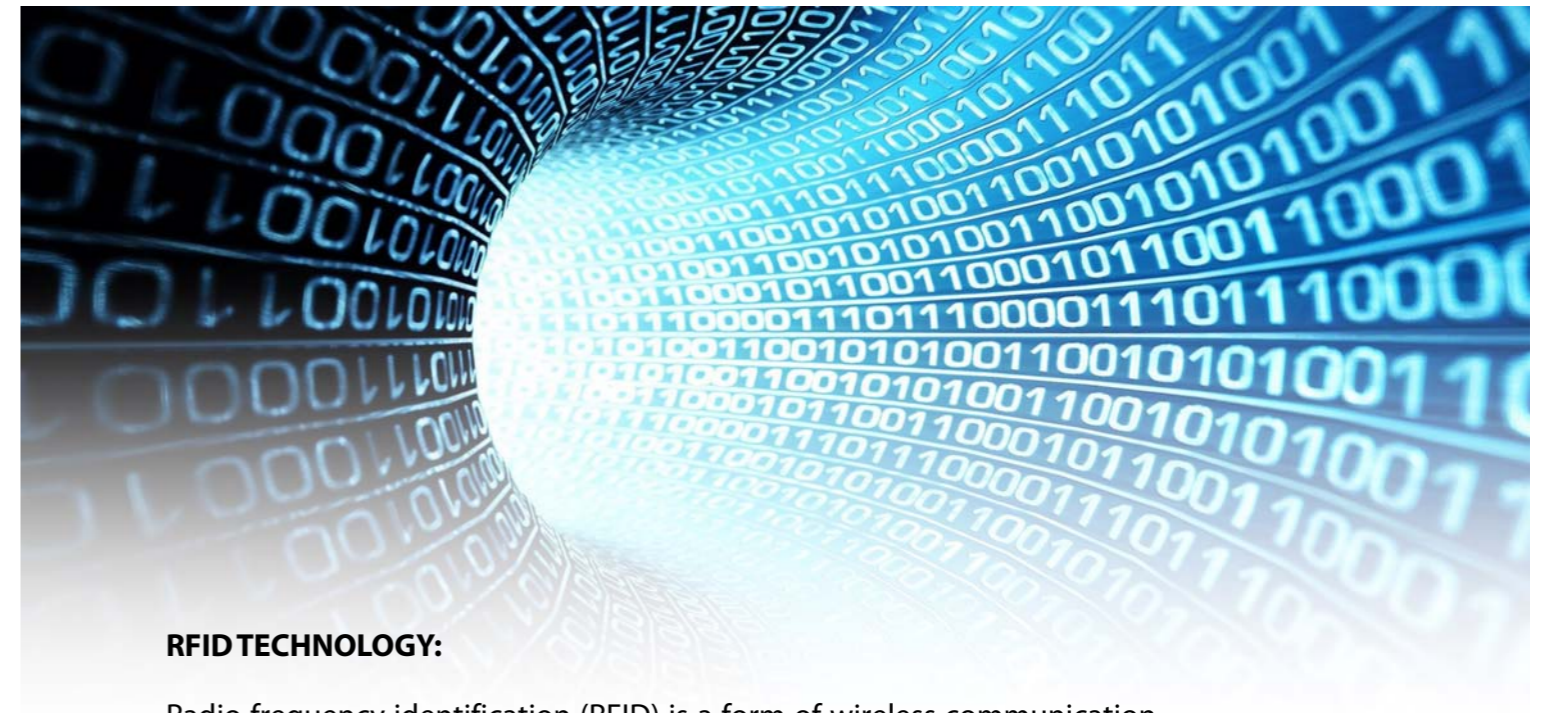

### HOSPITALITY

- Delegate Tracking
- Event Management
- Asset Management
- Linen & Laundry Management
- File & Document Management
- Inventory Tracking

### WAREHOUSE/LOGISTICS/SUPPLY CHAIN

- Warehouse Management
- Inventory Management
- Asset Management
- Vehicle Tracking
- File & Document Management

### RFID TECHNOLOGY:

Radio frequency identification (RFID) is a form of wireless communication that uses radio waves to identify and track objects. RFID takes the barcoding concept and digitizes it for the modern world providing the ability to:

- Uniquely identify an individual item beyond just its product type
- Identify items without direct line-of-sight
- Identify many items (up to 1,000s) simultaneously
- Identify items within a vicinity of between a few centimeters to several meters

RFID tags are sophisticated, intelligent devices that carry unique, field-updatable information. They leverage huge efficiencies not only in time, cost, and labor, but in unprecedented supply chain visibility. These are just a few of the reasons driving major retailers, Governmental organizations and other commercial organizations and entities to the deployment of RFID technology.

## SOLUTIONS OFFERED BY ACUBE:

**ACUBE FATS (FIXED ASSET TRACKING SYSTEM):** Acube FATS is an RFID based Asset tracking solution for retail, banking, automotive, construction, manufacturing, logistics sectors where the tracking and managing of assets is a concern. Organizations can efficiently keep track of critical assets while reporting real-time item disposition and Acube AMS provides reliable, automated asset management system, which eliminates redundancies, expenditures and labor.

## ACUBE EMS ( EVENT MANAGEMENT SYSTEM):

**ACUBE EMS** is a turnkey solution for managing your guest lists, printing and distributing accreditation, managing your clients during a live event, and reporting on the success of your event. **ACUBE Event** captures your guests' arrival time, duration of stay, and departure time automatically so that you no longer need to rely on manually counting guests. Use **ACUBE EMS** to analyze the success of your event, negotiate with caterers and event planners, and forecast future event attendance.

- Corporate Conferences
- Media and PR Event
- Social Parties
- Large Exhibitions
- Trade Shows

## ACUBE JIMS (JEWELRY INVENTORY MANAGEMENT SYSTEM):

**ACUBE JIMS** is an RFID based inventory management solution for Jewelry and Diamond Industry. RFID based **jewelry tracking system** enables tracking inventory via scanning and therefore instant stock update while increasing the staff productivity. Moreover, by automating these processes, the Jeweler can focus on his core business, viz selling Jewelry.

## ACUBE PTS(PEOPLE TRACKING SYSTEM):

There are a wide variety of reasons why people tracking is important to business. These range from health and security, access control, time and attendance applications to identifying patrons at trade shows and other events to billing based on pay per use. Our solutions have been used in residential buildings, offices, industrial plants, manufacturing facilities and warehouses, hotels, resorts, marinas, health and fitness clubs, event management, schools, banks, military zones, oil rigs... the list is exhaustive.

People Movement and Monitoring System is used for:

1. Tracking exact location of people.
2. Access control after identifying the personnel.
3. Time and attendance.
4. Report generation.
5. Zone Monitoring.

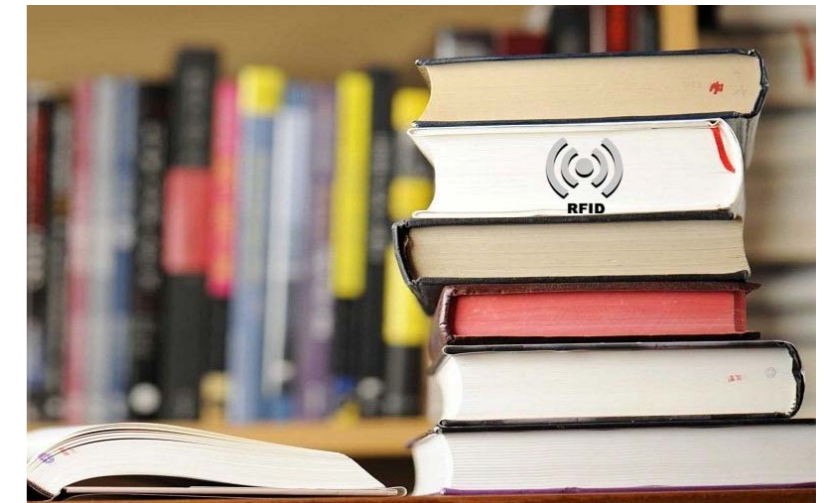

## ACUBE FMS(FILE & LIBRARY MANAGEMENT SYSTEM):

ACUBE FMS is an RFID document and file management system which allows an employee to locate any item quickly and precisely no matter where in the office it is located. The workflow process is streamlined and the information is readily accessible. The result is increased worker productivity and efficiency, allowing personnel to utilize their time in more effective ways. Customers and clients will also benefit when your company's records assets are well managed.

## ACUBE VTS (VEHICLE TRACKING SYSTEM):

The use of RFID technology in the automotive industry can be beneficial at all levels of the supply chain by providing accurate real-time visibility of tagged inventory, equipment and finished vehicles. RFID applications in the automotive industry range from supply chain control over quality assurance to yard management thereby optimizing processes and increasing overall efficiency. Acube enables automotive suppliers, logistic providers, OEMs and dealerships to streamline processes, reduce costs, increase quality control and improve customer service through tailored RFID solutions.

## ACUBE WMS (WAREHOUSE MANAGEMENT SYSTEM):

ACUBE WMS improves operational efficiency and productivity in distribution centers and warehouses around the world. Increased operational productivity, Reduced Costs, Improved customer service, Improved Warehouse Safety, Improved Employee Satisfaction, Reduced inventories in the supply chain and Increase in Product security are the few benefits in automated Warehouse Management System.

## RFID CONSULTANCY SERVICES

ACUBE was established to provide the most robust, reliable and least expensive Radio Frequency Identification (RFID) technology and platform. We are driving the adoption of UHF RFID solutions with total cost of ownership (TCO) with passive solutions. We can help you evaluate, plan, design, develop and implement highly efficient, cost effective and performance-driven RFID Solutions. Our RFID Consultancy services help users get the best from their RFID systems.

### Services Offered:

- RFID Research & Advisory Services
- RFID Briefings & Workshops
- RFID Strategy & Architecture
- RFID Software development
- RFID Systems Integration

WE ARE PROUD TO DEAL WITH WORLD RENOWNED BRANDS IN RFID
