CÉLESTE®

Eye Cream Applicator

A fusion of function and experience in skincare application.

This innovation is a cutting-edge skincare applicator that combines the benefits of micro-current massage and LED light therapy. This advanced applicator is placed directly onto standard cosmetic tubes, allowing for precise and effective application of eye creams and serums. The micro-current massaging effect, not only optimizes the absorption and the effectiveness of the skincare products but also turns routine treatments into a comfortable and luxurious experience. The design of the golden charging contact points simplify recharging and enhance durability.

- HD40

Phototherapy

Microcurrent

A sleek, rose-gold eye cream applicator with a long, tapered body and a faceted head. The head features three small red LED lights on one side and a vibration mechanism on the other. The cap is a simple, cylindrical rose-gold tube.

Eye Cream Applicator

Ultimate tool for eye area treatment.

This device is a multifunctional skincare solution designed to elevate your beauty routine. Boasting features like light therapy and vibration massage, it offers a comprehensive approach to skincare. On one side of its head, three LED light therapy lights, cleverly embedded behind transparent lenses, deliver targeted therapy to rejuvenate the delicate eye area. The opposite side of the head provides gentle vibration massage, promoting better absorption of the eye cream into the skin. Charging is hassle-free with wireless functionality, facilitated by strategically placed metal electrodes on both the cover and base of the eye cream. Inspired by the sleek aesthetics of the smart skirt effect, the eye cream's grip ensures both ergonomic comfort and stylish sophistication.

Eye Cream Applicator

Ultimate tool for eye area treatment.

This innovative eye cream packaging offers a comprehensive array of features designed to rejuvenate the delicate skin around the eyes. With functions including LED light therapy, roller-ball massage, and targeted wrinkle removal, it delivers a holistic approach to skincare. The metal roller ball head of the device enables effortless liquid release for massage, while the LED light therapy area in the center of the head emits therapeutic effects through the lens. For user convenience, physical switches are located on the handle, alongside a battery light which provides clear indication of charging status, full charge, and low battery levels.

Massage

Serum Applicator

Innovative skincare with advanced features.

This cap is designed to seamlessly integrate advanced features for enhanced skincare. Upon withdrawal of the liquid, the phototherapy function activates, irradiating the skin with beneficial light through the glass post-application. Conveniently housed within the silicone sleeve, the switch engages the function effortlessly when pumping the liquid, ensuring a hassle-free experience.

Eye Cream Applicator

The ultimate tool for eye care.

This device features a clean and practical design, with color renderings in cool white and dark blue lending it a medical-grade aesthetic. Its middle strip serves as a switch, activated by rotation, while three roller balls, arranged in a triangular formation, cater to various skincare needs. The top ball boasts a liquid discharge function for flexible usage. Inside the lid, retaining ribs prevent leakage, ensuring product integrity. Offering microcurrent massage and LED light therapy, HD49 includes a high-placed liquid outlet hole for precise application of skincare products, guaranteeing optimal results.

RejuveLight Therapy Wand

Innovative eye cream applicator with advanced features.

This advanced skincare device blends 630nm red light therapy, micro current stimulation, and soothing heat to deliver comprehensive skin rejuvenation. The red light targets fine lines and wrinkles, while the unique heat function boosts circulation and enhances nutrient absorption, revitalizing the delicate eye area. Meanwhile, microcurrent technology gently stimulates facial muscles, improving contour, firmness, and elasticity for a lifted, youthful appearance. Designed for targeted care, this powerhouse device enhances your skincare routine, leaving your skin radiant, toned, and refreshed.

Facial Sculpt Applicator

Vibration & LED Therapy for Radiant Skin.

This cutting-edge device seamlessly combines micro-current vibration massage and LED light therapy to deliver a powerful skin-rejuvenating experience. The vibration massage enhances facial firmness, effectively reducing wrinkles while lifting and toning the skin. Meanwhile, the LED treatment promotes overall skin health, improving radiance and vitality. Designed with precision, the applicator ensures targeted care for the delicate eye area, offering effortless cream application, wrinkle reduction, and a soothing massage—all while its liquid outlet allows for precise product dispensing. Elevate your skincare routine with this all-in-one beauty essential.

Toner Cap & Skin Sensor

Revolutionize skincare with smart toner dispensing.

This cap is specifically designed for toner-type skincare products, comprising two modules: the main module housing a liquid pump and the detection module containing sensors and liquid storage pumps. To use, detach the detection module and position the sensor close to facial skin for moisture detection. Based on the skin's moisture and pH values, the appropriate toner usage capacity and phototherapy plan are determined. Once testing is done, the lid is closed to initiate calculation. The designated toner volume is automatically extracted, and the phototherapy plan is activated. Upon completion of liquid extraction, press the liquid dispensing button to apply the toner, followed by activating the phototherapy function for ultimate skincare benefits.

Phototherapy

TrioCare Applicator

Transform your skincare routine with advanced features.

Experience the power of dual-light technology with 630nm red light and 415nm blue light therapy, designed to combat wrinkles and acne for a visibly smoother, clearer complexion. The red light therapy targets fine lines and signs of aging, while the blue light therapy works at a precise 415nm wavelength to reduce inflammation and restore blemish-free skin. To enhance effectiveness, the integrated heating function boosts skin metabolism, optimizing absorption and accelerating rejuvenation. For ultimate convenience, this device features a wireless, rechargeable design, allowing for multiple uses on a single charge—bringing effortless, professional-grade skincare wherever you go.
