

CANABLE

EXPERTS IN CANNING

Introduction

Through a simple can and a can-do attitude, Canable is about building strong partnerships with local businesses.

After successfully launching **Kiss of Wine**, our canned wine brand, and exporting to 10 countries, we now extend our canning know-how to you! By offering a superior product on a competitive platform, we're paving the way for small and middle-market producers.

Canning opens up limitless possibilities for the beverage industry. Our dedication to seeking unrivalled quality and expertise in packaging drinks has never been stronger. Yet, throughout it all, our values remain the same:

- Our commitment to our customers is the foundation of our business.
- The quality of the finished product is second to nothing.
- Delivery, execution, and operational excellence define us.

Why Canable?

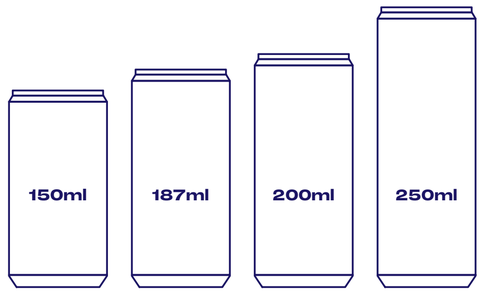

We're proud to be a canning company. There's a myriad of reasons why aluminium cans are the best choice. Aluminium cans are infinitely recyclable as well as easy to box and stack. They're lightweight and are also efficient for shipping and storage.

Cans are quicker to chill, which is perfect for when you want a cold drink fast. They provide the perfect surface for 360° branding and of course, protect flavour and freshness.

- Unbreakable
- Environmentally Friendly
- Easily Recyclable
- Convenient
- More Variety
- Single-serving

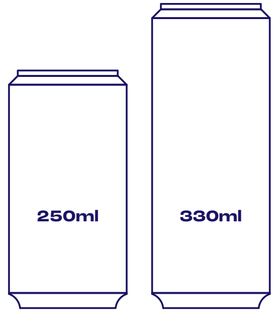

CANABLE

Volumes and Samples

Can as little as 6,000 Litres/25,000 cans

With such a small minimum, we help small to mid-sized drinks companies access a new market trend by selling their drinks in cans!

Samples

Samples are a great way of presenting your product to potential buyers, for trade shows or for tenders, without the need to produce a large amount in advance.

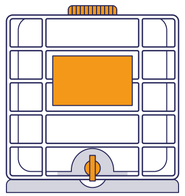

We offer canning samples of 5-20 litres of your product. This is available for a flat fee of **€1500**.

CANABLE

Printing

We offer two processes to get your design on your cans:

Printed Cans

Pre-printed cans allow designs to be printed directly on the aluminium. They are available with **no minimum** order.

Printed cans can have matte, gloss or metallic finishes. Design fees apply.

Shrink Sleeves

Shrink sleeves are soft plastic tubes that have your design printed onto them.

They are wrapped around the aluminum can and heated, making the plastic shrink to perfectly conform to the shape of the can.
