

**XPO: ON BOARD FOR OVER 30 YEARS**

XPO began by organising deck plans and related technical systems, before moving on to manage complete technical and sporting projects for sailing yachts. Over time, the commercial activity naturally took hold.

Today, XPO has the know-how and expertise to design and supply equipment for both sailing boats and pleasure craft.

As the exclusive representative in France for brands that are essential to sailing, XPO works with a network of dealers throughout France and overseas.

XPO, EUROPE'S LARGEST STOCK  
STOCK OF THE FAMOUS ITALIAN  
BRAND OF DECK FITTINGS.

## XPO AND ANTAL, A FAMILY STORY

The current development of XPO (Xavier Phélipon Organisation) is largely the result of a meeting between Xavier PHÉLIPON and the CARRARO family, founders of the famous Italian rigging brand ANTAL.

In 1994, the ANTAL brand, lacking visibility in France, was looking for a distributor. Xavier Phelipon, convinced by the quality and creativity of the brand, decided to work with XPO to develop the commercial side of its activities in order to promote the brand in France.

Since then, the 2 companies have worked together to offer reliable and innovative products to yachtsmen. As a result, XPO has become the world's leading reseller of the brand, thanks to its large stock and excellent product knowledge.

Working with XPO means working directly with ANTAL...

# FURLERBOOM

 by 

## IN-BOOM FURLING BY FURLERBOOM

When XPO introduced the first FURLERBOOM in-boom furler to the French market in 2007, the product was largely innovative in terms of its functionality, ease of adaptation to all types of rig, intuitive operation and aesthetics. At the beginning manufacturing took place in a small garage, but production has since expanded considerably to meet the growing demand from the market. Today's production capacity not only allows us to respond to individual requests on existing boats, but also to requests from boat builders to meet specific demands for their boats.

Xavier Phelipon, who is often in Denmark, regularly visits the Furlerboom workshops to discuss and monitor current orders and, if necessary, to contribute his sailing experience and knowledge of the French market to product development.

## A COMPLETE PACKAGE TO SUPPORT YOUR PROJECT

XPO offers FURLERBOOM in-boom furling systems for sale and provides complete support from order to installation. In collaboration with the best professional riggers and sailmakers, we will be at your side to make your project a reality with the transparency and follow-up that such an investment requires. Our aim, which we hold dear, is to enable you to sail quickly and safely without compromise.
