

Since 1991

Mingwei® Kitchenware

A factory that spent a decade
developing its own equipment to
address strainer colander cleaning
issues with one-piece bowl.

Oil Skimmer Spoons

The MINGWEI® multi-functional oil skimmer features thousands of fine holes for even distribution, effectively removing grease, foam from hot pots, and filtering food scum.

We are pioneers in upgrading the traditional oil skimmer, transitioning from a mesh part to a solid stainless steel sheet design with dense and tiny perforations. This innovation addresses cleaning issues and significantly enhances the product's lifespan.

Extra-fine Strainer Sieves

The MINGWEI® Extra-fine strainer sieve can ensure maximum retention of small particles, making it a versatile tool for various culinary applications.

Its functions include acting as a flour sieve, filtering juices or soybean milk, skimming, serving as a pasta strainer, and efficiently removing residues during frying, etc.

Furthermore, the one-piece bowl design ensures effortless cleaning and makes it dishwasher safe.

Extra-fine Colander Sieves

With a fully-perforated one-piece bowl, our colanders offer superior drainage with minimal loss. Ideal for sifting flour, sugar, and rice, they are also perfect for various food preparation such as rinsing and washing fruits, vegetables and grains. Additionally, they can be used in a pot to steam vegetables, cook pasta, or for frying.

Water-cubed Strainer Scoops for Hotel & Restaurant

The MINGWEI® water-cubed strainer is a progressive version of the traditional wire fryer strainer.

The inspiration for the water-cubed perforations is derived from diamonds. Occupying the same area, hexagonal perforations offer a denser arrangement compared to circular ones, resulting in enhanced liquid filtration speed. This feature is ideal for chefs, offering an efficient solution for their needs.
