OUR PHILOSOPHY

GIVING GREATER HAPPINESS TO A GREATER NUMBER THROUGH BEAUTY & HEALTH.

Building a richer life, from the microscopic level. A materials trading company that handles research, planning, and development proposals.

With changes in prescription types and manufacturing processes come changes in the materials needed for high-quality products. We currently handle approximately 5,000 types of raw materials, but in this micro-world, there are limitless possibilities still hidden.

In the 90 years since its founding, Iwase Cosfa has taken on the challenges of this micro-world, providing materials for pharmaceuticals, cosmetics, and health foods, and expanding development of original raw materials. Proposals aren't limited to the micro-world, however, as we also make proposals for related technologies and information.

We wish to continue contributing to the rich and healthy lives of our customers by utilizing the technology and experience we've cultivated as a research, planning, and development proposal trading company.
