Services & Solutions for a

# GREENER MARITIME FUTURE

## Bunker Quantity Survey & Inspections

**Bunker fuels and fuel consumption represent 40-60% of total operating cost and the largest operational expense to ship operators. The journey towards decarbonisation directly affects bunker costs, necessitating the use of more expensive sustainable fuels in addition to emissions taxes or compliance penalties.**

Maritec Naias Bunker Quantity Survey (BQS) services complement our core business in bunker fuel testing, allowing us to safeguard the interests of bunker purchasers with regards to quantity and quality of fuel, particularly in the event of disputes.
Our team are experienced and qualified to assist dispute resolution cases, aiming for an amicable claims settlement. Credibility, integrity and impartiality within our BQS network have been the foundation of a trusted and well-established service valued by bunker purchasers worldwide.

**In addition to BQS services, our survey department, accredited by ISO/IEC 17020, also offers extensive inspection services such as:**

- **ROB Survey**
- **On/Off Hire Survey**
- **Bunker Audit Survey**
- **Bunker Dispute Investigation Survey**
- **Sludge Survey**
- **Bunker Tank Sampling Survey**
- **General Condition Survey**
