Rubycell Mask	15 - 16
Cosmetics Container	17 - 18
PRODUCT PORTFOLIO	19 - 22

Cushion Puff

This is a cushion puff which can be developed into different shapes and sizes to clients' need.

01

Variety of fabrics

Rubycell fabric has different absorption and discharge capacity depending on which manufacturer it is from, and thus, it is important to choose the right one considering the content. We have various fabrics that are manufactured in Korea, China, Japan, etc. and provide samples so that the client can test with the actual product.

02

Variety of colors

Clients may choose from 80 ribbon colors, gloss/non-gloss texture, grosgrain, etc. according to their need.

03

TPU band-type puff

TPU, an eco-friendly material, is water-resistant, which prevents foundation stains on hand and allows clear printing results for character designs.

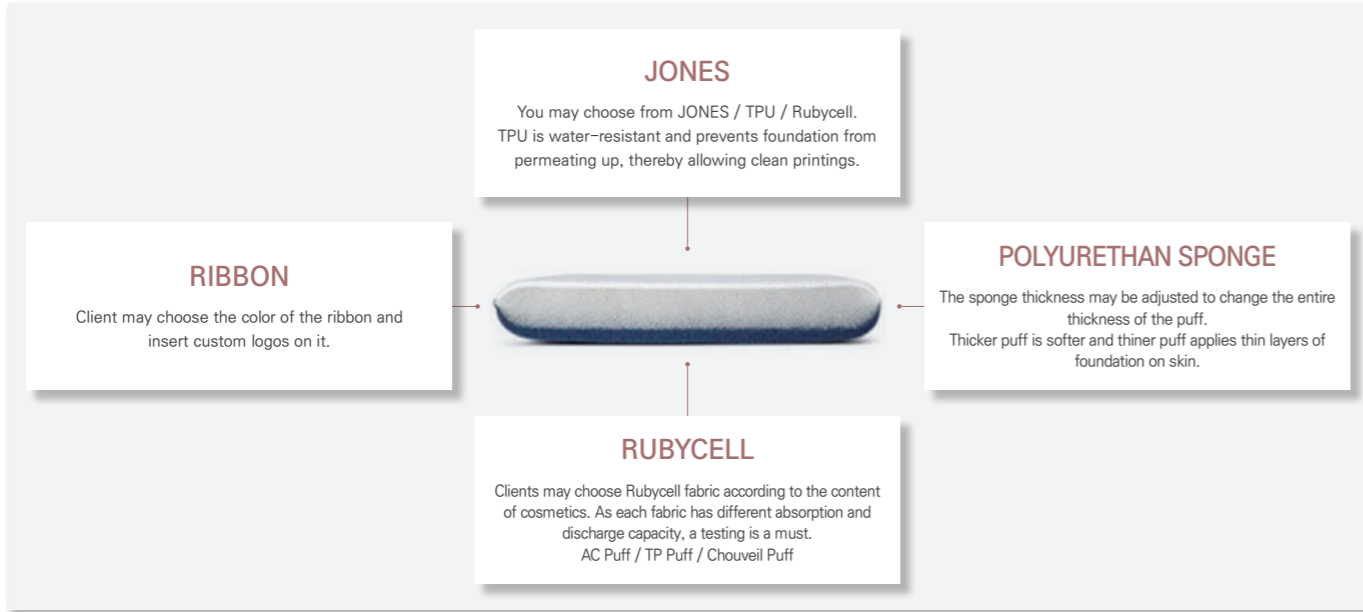

04

Variety of designs

Bhada holds more than 30 types of puff molds to choose the design that fits the client's needs.

Cushion Puff's Structure

Digital Print Puff

Designs can be printed under the ribbon and a logo can be inserted on the ribbon.

TPU Band-Type puff

TPU band may be attached to the puff to print the identical design even to print the identical design even on the band.

Mesh Puff

Punches on the surface of puff helps consistent absorption and discharge of cosmetics to create even skin texture.

Embossed Puff

The surface of the puff is embossed to boost application on skin. Design may be changed.

Eco-Puff

We create eco-friendly puffs using eco-friendly fabrics.

Double-Sided Rubycell

Soft and premium design by using Rubycell instead of PU material.

Whole Rubycell TPU Puff

TPU can be attached to Rubycell for a premium design.

Sticker-Type Puff

Sticker-type Rubycell can be made into a removable style so that customers can use it in a more hygienic way. It can be used with a silicon puff.

POWDER Puff

This is a powder puff that is perfect for matte finish makeup.

It can be made into various sizes and shapes per the container's size.
We can make it into either economically price sealing type or premium hand-made type.

Micro Fiber Puff

This puff is perfect for light finish makeup and is often used for no-sebum powders due to its economic price.

New Polyester Puff

This puff has a slightly longer pile than micro fiber (choose from 2 or 3 mm pile length).

Flocked Foam Puff

This is perfect for light finish makeup and is often used for pressed powders

Velvet Puff

This is a premium puff with a soft texture that is often used for loose powders

Recycled PET

This is an eco-friendly puff that is made of recycled plastics

Fluffy Powder Puff

This puff is used for powders and blushers. It has long pile lengths which is suitable for body products.

Suede

Use suede or artificial silk on top of a puff for a premium design.

Artificial Silk

Use suede or artificial silk on top of a puff for a premium design.

Make-up Sponge

It is perfect for liquid foundations. It can be made into various shapes.

01 NR Sponge

This sponge is made of natural rubber. Though it has weak durability, it is economically priced, thus often being used as daily sponge. It can be made into various shapes and colors.

02 NBR / SBR Sponge

It has great oil-resistance and wear-proof features and can be washed and used for a long time. It is soft and creates less friction for even application of cosmetics on the skin, making it a great base makeup applicator. It can also be used for cream, powder, blushers, etc.

03 3D Sponge

It can cover wide areas such as forehead and cheeks with the round side. Diagonal and pointed parts can be used for precise makeup on nose, mouth, and eye areas.

Immersion Sponge

This sponge is often included in cushion makeup products. It should be tailored to the cosmetic product and patent standards.

Ether Sponge

This is the sponge type commonly used in Korea. It is highly water-resistant and can be used for a long time as it is not hydrolyzed.

Reinforced Polyester Sponge

This is often used in countries where ester cannot be used due to patent issues. It is vulnerable to water, but strong against oil.

MIX Sponge

Ester and ether can be blend for tailored use of cosmetics. The blend ratio is usually 5:5 or 7:3.

BIO Sponge

This is a patented sponge that added bio-polyol, a soybean extract, to ether. It is often used in eco-friendly products.

Logo and patterns may be laser-imprinted on sponge.

Cleansing Goods

It can minimize irritation to skin and eliminate particulate matter, impurities in pores, as well as residual makeups.

Cleansing Puff

This puff is made of soft fabrics such as bamboo and micro fiber that minimizes irritation to skin for gentle pore cleansing.

Cellulose Sponge

This sponge is made of Cellulose, a natural and biodegradable ingredient that is not harmful to human skin. It provides deep cleansing effects.

Sea Sponge

This is the natural sponge harvested from deep sea. It provides excellent exfoliating effects against sebum and dead skin cells

PU Sponge

Anti-bacterial processed polyurethane sponge that can be used for a long time.

Cleansing Brush

Dual brush that can exfoliate pores and dead skin cells

PVA Sponge

Soak in water for gentle exfoliation. It is used frequently by dermatologists

FASHION MASK

This is a mask made with high-quality fabric which is a premium fabric used for makeup cushion puffs. It can be worn comfortably without irritating skin. It may be developed with tailored specifications (e.g. design, thickness)

APPLICATOR

We make various types of brush such as makeup brush, silicon brush and eyeshadow applicator. We can produce custom brushes with the color, hair type, and length you want.

PACKAGE CONSULTING

We propose the product that is the closest to the brand concept from a wide range of products that can be found in Korea and overseas.

We will create the best product with our client based on our expertise from the design, quality, and processing methods.

01

Consultation

We consult our clients to identify the image and concept they wish to create.

02

Proposal and sample

We propose several high-quality containers and provide samples according to the client's design.

03

Select design/specification

When the container is decided, we produce and provide a prototype according to the design concept.

04

Mass-production/management

We oversee the production from the early stage to the completion in collaboration with the manufacturing plant for strict quality control.

Items

We develop various containers for cosmetic products such as cream container, powder container, cushion product, shadow container, and stick products.
