

**WORLD PREMIERE AT CANNES YACHTING FESTIVAL 2026:
THE ANVERA 200 EXCEEDS 70 KNOTS.
A NEW RECORD. A NEW CLASS: THE HYPERYACHT.**

CANNES, September 2026 — Anvera arrives at Cannes Yachting Festival 2026 with its range of carbon-built boats and unveils the **world premiere** of the Anvera 200: a technological manifesto redefining performance yachting and setting a new world speed record for its category. Over 70 knots. No compromises.

Alongside other models in the Anvera range, the Anvera 200 will take center stage as the undisputed highlight of the stand. The Anvera 200 is the brand's new flagship, crafted entirely in carbon fiber and redefining performance yachting through the highest standards of comfort, design, and engineering.

With the Anvera 200, a new class is born: the **Hyperyacht**. Developed from the shipyard's construction philosophy — based on lightweight properties guaranteed by full carbon fiber — this 66-foot yacht is equipped with **twin MAN V12 engines delivering 2 x 2,200 hp**. Paired with Top System surface drives, they propel the vessel to **over 70 knots** while ensuring exceptionally low fuel consumption and an extraordinary range. A world record for the category, a threshold that no other production boat in its class has ever achieved. A world record for the category, a threshold that no other production boat in its class has ever achieved.

At 20 meters in length with a beam of nearly 6 meters — extending to almost 7 meters with the side terraces open — the Anvera 200 rules the sea. The aft deck alone spans over 30 m². Inside, exceptionally generous ceiling heights and carefully considered layouts — up to three cabins, a spacious lounge and dining area beneath the T-Top, a crew cabin with private access — redefine the onboard experience. A seamless extension of the owner's living space, conceived to bring the same sense of freedom one would expect from a private seaside villa.

At its heart, **twin MAN V12 engines deliver 2 x 2,200 hp**, paired with Top System surface propellers, push the Anvera 200 beyond 70 knots — a world record for its category, and a threshold no production boat of comparable class has ever reached.

Produced in an ultra-limited series, each unit is fully customizable inside and out, reflecting the owner's vision with

absolute precision. Beyond performance. Beyond expectations.

ANVERA 200 TECHNICAL SPECIFICATIONS

- **Construction:** Full carbon fiber — every component built entirely in-house
- **Overall Length:** 19.97 m / 65 ft 5 in
- **Maximum Beam:** 5.96 m / 19 ft 5 in (6.85 m / 22 ft 4 in with terraces open)
- **Engines:** Twin MAN V12, 2 × 2,200 hp
- **Propulsion:** Top System surface propellers
- **Top Speed:** Over 70 knots — world record for the category
- **Aft Deck:** Exceeding 30 m²
- **Interior:** Up to three cabins — lounge and dining area under T-Top
- **Series:** Ultra-limited — fully customizable inside and out

ABOUT ANVERA

In the exclusive world of high-end nautical design, Anvera stands out as a **technological Italian atelier** where craftsmanship, advanced engineering, and unmistakable style come together. Based **in the heart of the Italian Motor Valley** — Misano Adriatico — each boat is born from a singular vision: to deliver an exceptional experience in which performance, design, and functionality coexist in a fully bespoke creation. No two Anveras are ever the same.

Every model is built entirely in-house, applying technologies derived from the most extreme high-performance engineering contexts: **Hypercar, Formula 1, Offshore Class 1, and aviation**. From carbon fiber lamination to the final paintwork, every stage of construction is managed within Anvera's own production facility — ensuring total control over quality, precision, and timing, and making each yacht a seamless expression of performance and design.

What truly sets Anvera apart is its ability to fuse technical precision with a sense of identity. Colors, materials, and finishes are calibrated to harmonize with the design of the client's Maxi Yacht — or even their hypercar. It is not a question of selecting options, but of a fully bespoke experience: every line can be reimagined, every detail intentional, precise, and entirely unique.

Whether configured as a Chase Boat or as a refined Day Cruiser, every model is designed to serve with speed,

versatility, and elegance.

STAND DETAILS

The Anvera team will be available throughout the event for private presentations and sea trials, by appointment only.

Stand Details: Viex Port, QML 034
