Silent Gliss

CURTAIN TRACKS

SilentGliss

The Sound of Silence ...

Silence got even quieter with the Silent Track range. Resolutely architectural, specially designed tracks married with unique, 2-component (2C) gliders, resulting in unprecedented quietness.

Think of it as a reboot of Silent Gliss founder Alexander Weber's game-changing innovation from 1952, which set the bar for noise-free curtain-track performance. A number of patents later and Silent Gliss has taken another major step forward with its Silent Track range.

2-component glider

As much the product of a deep visual consideration as it is an aural one, **Silent Track** sets a specification standard – aimed at architects, interior designers and private customers who aren't prepared to compromise on their creative visions.

The track profiles come in range of forms – square, round, oval, rectangular and funnel-shaped. And with Silent Gliss's comprehensive collection of functional fabrics, there's even more scope for customers to get exactly what they want.

So spread the word. Whatever you do, don't keep it quiet.

SUSTAINABLE

Silent Gliss products are manufactured within an environmentally friendly, safe and socially responsible framework. We strive for sustainable growth through the harmonisation of economical, ecological and social factors.

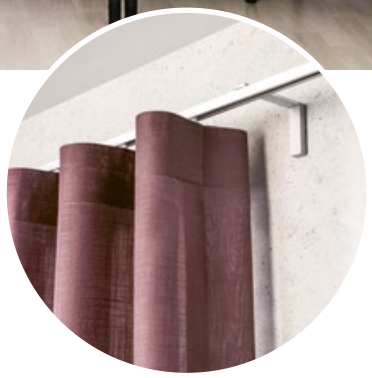

... by Silent Track

The silent revolution – 2-component technology!

The premium patented 2C gliders and rollers, combined with the specially coated tracks allow the curtain to move smoothly and silently. These gliders are manufactured using 2 materials, a hard component which ensures stability and a soft ‘filling’ to absorb the noise. The end result is unprecedented silence.

WAVE 2C GLIDER-CORD AND SMART FIX

The Wave 2C glider-cord creates the continuous wave effect of the stylish Wave.

Silent Gliss systems can be fitted with the uniform Smart Fix bracket range. The design includes magnetic metal covers which are easy to fit and elegantly hide the screw. Three designs in various lengths offer flexibility and ease of installation.

COLOUR OPTIONS

The profiles are powder-coated white or anodised aluminium as standard. The most popular systems are also available in black with matching components. Custom colours are also optional, turning a functional fixture into a truly remarkable design element.

SILENT GLISS – THE BENDING SPECIALIST

Silent Gliss tracks can be forward and reverse bent to accommodate the most challenging installations seen in modern architecture. Advanced techniques and years of experience ensure maximum gliding efficiency on the tightest curves. Recess profiles are offered that can be bent to tightest radii – the curtains appear to literally hang from the ceiling!

Passion for details.

Operation solutions for all interiors

With our range of intuitive operation methods, the ideal solution is just a touch away. Whether manual or motorised, you are assured of the same quiet and smooth movement.

ELECTRIC OPERATED

For the ultimate convenience and ease of operation choose the SG 5600, the world's leading motorised curtain system. Smooth, quiet and powerful. The patented 2C roller glider in combination with the Swiss-developed motor and the specially coated profiles ensure superior performance. The 'Touch & Go' function sets the curtain in motion with just a slight pull, without the need for a switch or remote control.

Our App gives you access to your tracks via a smartphone or tablet, whilst our smart motors allow integration into most leading home and building management systems.

CORD OPERATED

Cord operation avoids the need to handle the fabric and easily controls heavy curtains. The systems come in two distinctive designs and three sizes. The square tracks even feature an optional bendable recess profile.

All our cord operated curtain track systems are child safe and comply fully with safety norms EN 13120, EN 16433 and EN 16434.

HAND OPERATED

Regardless of area, size, shape or colour, Silent Gliss are able to provide high-performing hand operated track. The systems are available in three sizes and five outstanding designs. A bendable recess profile for the square track is also offered.

Suspended tracks are available – ideal when air circulation or room separation is required. In summary – the widest choice to provide the perfect finish for any interior.

Fabrics – beyond decoration

The Silent Gliss Collection sets itself apart by considering both the fabric's texture and technical features. We offer a wide range of styles and colours that balance function and design across all of our window treatment systems.

We include fabrics with special functions such as acoustic performance, superior light management, antimicrobial and environmental considerations. All of our fabrics are flame retardant and have been extensively tested on our systems to ensure consistent hanging behaviour.

Check out the Silent Gliss online fabric finder.

Our exclusive Colorama fabric is available in 30 colours and washable up to 72°

Colorama Multicolour woven with multicolour yarn for attenuated colour and texture

Dimout fabrics for room darkening

Antibacterial and stain-resistant fabrics suited to healthcare environments

WAVE – THE REINVENTION OF THE CLASSIC CURTAIN

Only a curtain from Silent Gliss can make waves whilst radiating tranquillity and harmony. A unique curtain heading system that turns traditional curtains into a striking, modern design statement.

Wave offers a contemporary design feature, created by a unique 2C glider-cord inside the track which restricts the extension of the fabric. The end result is a continuous 'wave' effect when the curtains are closed and when opened, a neat stack back.

80mm Wave for a deep, defined shape.

60mm Waves for a subtle, flowing finish.

Curtains that dress themselves.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatments. Since 1952 we have been tirelessly committed to the development of the worlds' smoothest, quietest systems using state of the art technology.

Driven by customer needs, Silent Gliss offers functional and durable products. Expert technical advice coupled with installation and support services complete the offer. Silent Gliss stands for innovative, sustainable, tailor made solutions, exceptional design and first-class quality.
