Natural Interaction. More Natural Feeling.

TactGlove, the world's first consumer-ready, wireless haptic gloves designed for AR/VR technology. TactGlove works with camera-based hand tracking systems, such as Meta Quest 3, Pro, and 2 and Varjo XR-4 and XR-3 with Ultraleap. Bring hand tracking to life by adding haptic feedback to your hands. Make Your Touch Count in VR/AR with real-time haptic sensations at only 249 USD.

The Gloves to Feel.
Not for Tracking.

\$249
(pair)

Compatible with
Camera-Based
Tracking Systems
